

SWITCHING RESPONSIBILITY AGREEMENT FOR COLLABORATORS

I understand that I and my collaborator should **switch** responsibilities for

- 1) **Hardware** (FPGA, lab equipment), and
- 2) **Software** (Quartus, VEE)

in every **alternate** experiment.

The responsibility for hardware requires wearing **ESD wristband** during the experiments whenever touching the relevant equipment is imminent.

I will be responsible for **hardware** in

- Odd-numbered (1,3,5,7) experiments
- Even-numbered (2,4,6,8) experiments

whereas my collaborator will be responsible for **software** for these experiments.
